

i am an over the road truck driver and my partner has the xm radio in our truck .not allowing local news on sattalite radio would be bad news to me i travel to many cities every week and there is no possible way to memorize all the local news stations to see whats going on in that city.I Depend on reports of weather and traffic before i get to a city ,this way i can make decisions that help my saftey and the saftey of all the people i share the road with.Trying to find a local station is hard and by the time i do i am already in the city not laeving many options.Pease keep local news and events on satelite radio for the saftey of all drivers on our highways and roads of america.
